The Guru Within

Holistic Professionalism for Sustainable Excellence in the Indian Context

Nitya Gurukula's **Holistic Professionalism for Sustainable Excellence** in the Indian context is an experiential workshop for Entrepreneurs, CEOs and Industrialists to create a work-life balance, and develop visions and competencies beyond limitations of self, others and environment. This balance brings strong roots in one's personal life and stimulates professional development that reflects in their organizations.

Holistic Professionalism is Professionalism in totality

- An individual's total self, the different layers of existence in each of us
- Blending and balance of Self, Other and Environment

Nitya Gurukula describes excellence as 'Bettering the Best', and sustainable excellence is the practice of making excellence a way of life, personally, professionally and organizationally. The Indian context is in a cusp phase - polarized between its traditional heritage with its values and beliefs, and Western individualistic, target driven, achievement focused approaches and methods. Nitya Gurukula bridges the difference here with its vision of '**The Guru Within**' based on its approach of '**East West Synthesis**'. It offers possibilities and options to practice "Professionalism for Sustainable Excellence" in daily life.

NG Holistic Professionalism is a transformational workshop wherein participants are facilitated to outline their own brand of 'Professionalism', make their work life more meaningful and help their organization grow and develop. They are guided to draw a plan of action and strategize to make it happen. This is a step to practicing Sustainable Excellence; being the talk and making it happen organizationally.

Program Highlights:

- Work life balance, Visions & Competencies beyond Limitations
- Rooting & development - Entrepreneurs, CEOs & Industrialists
- Professionalism in totality - Self-Other-Environment blend
- Sustainable Excellence - Bettering the Best
- Excellence as a way of life personally, professionally & organizationally

NG Holistic Professionalism Outcome:

- Participants outline own brand of Professionalism
- Plan of action & strategies for Sustainable Excellence
- Being the talk and making it happen

The Lead Team - NG Holistic Professionalism

Sashi Chandran is a Psychologist, Counsellor, Educator and Community Worker with expertise in Coaching, Life Skills and Psychology synthesizing various disciplines like Transactional Analysis, Taichi and Yoga. A Teaching and Supervising Transactional Analyst, Sashi's approach is founded on **"The Guru Within"** which is instrumental in guiding one's holistic life experiences.
